Roblox is an incredible game that gives people the opportunity to play in a virtual world that has so many different games, and it's also completely free. In Roblox there are many different categories of games you can play, for example you can create your own game, and the possibilities are almost endless. The first thing I was really interested in when I started playing Roblox was creating my own avatar which was really fun because you have a lot of options to choose from. You can pick from what hairstyle you want to wear or even what kind of clothes you want to wear. You can also pick how big or small you want your avatar to be, how they look in the mirror and of course what color the hair is. You can even choose if you want them to wear glasses or not.

In January 2016, the Roblox developers said they will be working with an external security firm to enforce a set of rules, and would only support third-party software that is approved by their partners.

To use this tool you need a ROBLOX account on your device. Download this free application and follow the instructions to setup your account (If you don't have any yet). Put in your game ID and get enough points from playing for the amount of free Robux that you want. You can redeem them on Roblox or keep them in your account and use them on other games later. Don't worry about getting banned because of this tool, all of the points are temporary and will be deleted after 48 hours. Have fun!

The ROBLOX site and forum have received a lot of criticism from its users regarding many issues, such as: Administrators are able to delete user-created games without warning or notice. Users can't defend themselves since the only way they could do so is by contacting an administrator or lawyer. Administrators can ban users for doing anything they don't like or don't agree with. However, administrators have been known to ban users for no reason at all, usually if the user is a moderator or an insignificant/low-level user.

The CEO and founder of Roblox is David Baszucki, who is also known as "Devdog". He made his first \$1 million by using a stock option from a company that he had worked at called Original Media. He was fired from the company for not coming up with any new products despite having achieved success in the existing ones. After this, he started to work on ROBLOX alongside his friend Owen Hill. Although Roblox was founded only in 2009, they had already made their first \$1 million by 2013.
