I guess that's one of the reasons why Minecraft is so popular; it's simple and easy to understand, because of things like having to collect resources to build things. If you see a home on something like Roblox and Minecraft, it's probably built out of random things a lot of people gave you; whereas in Minecraft there are actual blocks which you can use in the game itself.

The inventory of each user cannot be accessed by anyone else. If you want to find out what a piece of furniture is for, you are going to have to purchase it from your inventory. There is no sharing of items between users; they can only be found in your own private stash.

I have attempted to make a list of all the free Roblox code sites and codes I know of. You should be wary when using these codes, as some do not work anymore or may lead to viruses/malware on your computer. I've also made a list of which sites are safe and which sites are unsafe for you to visit. Please be cautious and do not enter any codes you have found in a comment on Youtube, on Reddit, or anywhere else. Always make sure to read the comments of the videos and follow all instructions before using them.

As of 2015, ROBLOX does not require end-users to use their own search engine to find games.[18] This is bad as some users search for objects such as skins and items instead of games. This can lead to confusion because they may get a game search that directs them to user's profiles instead.

In December 2011, a lawsuit was filed against Roblox for copyright infringement, in which ROBLOX is accused of copying the entire codebase and game assets of "Infinity: The Quest to the End of the Universe". A cease and desist was also filed against ROBLOX in September 2012 by a head developer from the website Games Done Quick for using their copyrighted content without permission.
