On December 23, 2017 (12:00 PM), ROBLOX released a new website design. The new design changes the way that how a user views a forum to have more details to see what is being posted on certain forums. There are also many improvements such as major revamp and update to the website's code. There are many game developers operating within ROBLOX. Below is a list of them, arranged alphabetically by last name: The most popular game on ROBLOX was Roblox High School, which had over 3.3 million plays in 2011, and 1.9 million in 2012 by September 2012.

Not all games are created equal and often we see them develop at an incredibly fast pace which makes us believe that this process will be smooth and easy but it doesn't always happen that way: first of all, people often have unrealistic expectations for themselves and secondly they forget to look at what others are doing and how the market reacts to new games.

On August 28th, 2019 ROBLOX announced the discontinuation of ROBLOX Custom Physics in favor of Bloxlet. This will eventually be released as an update so that all games made for Classic ROBLOX mode will automatically have the new physics system in place, but there is an unknown future for what will happen to those games when the discontinuation happens.

Roblox has been criticized by parents for issues such as allowing players to have relationships with other users through the game, and allowing players to (unsuspecting) "friend" hackers. Other criticisms include consuming large amounts of bandwidth, and not being child-friendly. The site has been removed from school computers in order to protect children.
