Other things that need to be changed or fixed: Change the sound of the hook it is not loud enough and sometimes you can't hear it. So you just have to guess where the enemy is. Make an AMA thing just like Reddit but for developers so we can ask them questions and they will answer them. This will give players some more insight on why stuff isn't in game yet or why stuff is in game. It will also give players a chance to be more involved with the company and make them feel like they are actually doing something. This would also help with bug reports and glitches because then we could ask questions about what's happening and how to fix it.

The main reason for this update was to make ROBLOX a lot more social, as at the time the website only had game-based features. Also, players can now buy items (e.g., skins & backgrounds) with in-game currency and have them delivered to their homes.

The steps are very simple and you can register your account easily by just providing your username and password. After you have done that, then all that you have to do is download the generator and open up the game account by using the app. That's it. Pretty easy right? This generator will work perfectly without any problems so you shouldn't have any issues at all.
