On February 23, 2012, ROBLOX revealed that they had hired 241 developers to work for the company. On March 28, 2013, ROBLOX revealed that they had hired an additional 130 developers to work for the company. On September 3, 2014, ROBLOX announced that they had hired over 800 employees in total. ROBLOX held a previously-unannounced hiring day on June 23, 2012 where they hired over 50 employees. At the end of 2012, ROBLOX announced that the company was "growing faster than ever". In November 2011, the website oDesk.com had more than 100 "top experts" from ROBLOX who were ready to provide assistance and tips to anyone who needed them. The site has since been shut down due to their repetitive scamming of people on oDesk.com using ROBLOX as a platform for money making. On March 28, 2013, ROBLOX announced that they had created a new partnership with GameSys on top of their cooperation with Hinton's Online Group Inc.

ROBLOX also allows people to manipulate the games in an unfair way; they can do this by changing the difficulty level of a game or removing potential players from playing a game. They also can sell cheat codes on their website. This is similar to the "scams" created by advertisers in that they are selling cheats for an unfairly high price (such as \$2.50 USD) so that only people who pay will be able to use the code to cheat or hack the game. However, this is an unfair way of making money.

In late 2015, ROBLOX introduced ChatPads. These ChatPads function like keyboards for players with a webcam. The players can use a webcam to talk with each other as well as guests while playing the game. However, there are no audio chat functions. One feature of the new chatpads is that if you lock your screen when playing game, it will automatically unlock when you tab out from games to bring up your keyboard and chatpad features.

ROBLOX has also been compared to popular game Minecraft. In many ways, they are similar; both games have been developed by one company (Tencent) and are usually sold on the same platform (Windows, OS X, iOS, Android). Another close similarity is that they both have their own in-game currency system. However, Minecraft has a different style of gameplay relating to platforming; while ROBLOX players build and destroy using building blocks, Minecraft players explore a world.

Some users have also claimed that ROBLOX never responds to or bans reported users. This is because there are many cases where both inappropriate content spreads rapidly through the site, but ROBLOX does nothing about it because they do not want to ban accounts for minor rule violations like swearing, nudity or spamming in chat.
