Users can report a game if they feel like it does not follow the rules. Either the game will be deleted or the owner will be warned, but most of the time the game is deleted. On January 5, 2017, a legacy avatar called Trollface became unusable because of DMCA claims from its artist. As such, ROBLOX disabled all avatars that use his artwork. It was later re-enabled after copyright claims were retracted.[39]

If you have decided to use one of the Free Robux promo codes for ROBLOX, then you should always remember that you will only be able to use them once. You should also not come off of the website and think that there is nothing else to do or check out since there are lots of different things available on this site. There are also very limited resources which can be used for other people after using them inside your game account in ROBLOX. You should always remember to be very careful with your account information and never share it with anyone else. This is also the best way to protect yourself from those people who might want to hack or delete your account. If you use this method, then you can easily stay safe and continue enjoying all of the fun games that are available inside Roblox.

The Market is an area where players can buy and sell in-game items. Items sold here will typically be cheaper than in-game shops. This is the only way to buy items from outside the game, as users are not allowed to purchase things from other places such as the in-game shop.

There are two kinds of issues with Roblox development. One is syntax issues which deal with how the code works and how to make it function correctly. The other one deals with data issues which involve working with saved variables in games. Since users can change data, they are prone to having issues in this area.

On July 31st 2019, ROBLOX announced they would no longer be supporting this feature, and will be removing all games that are now using this physics system from the ROBLOX Catalog. This will affect nearly every game and millions of gameplay hours into future. The reason why they are discontinuing the feature is because most games with custom physics settings were [[Rage Quitters's favorite targets, and almost all of them are either unplayable or broken due to Roblox's buggy physics engine.
