ROBLOX has been criticized many times since its creation. Many users have been dissatisfied with ROBLOX's in-game currency system which involves real money transactions. The price of things such as hats and shirts can be absurdly high, which causes some users to scam others out of their money. This can discourage people from making positive contributions to the game due to its poor reputation among many players.

This section will provide an overview for the company's future prospects. This list is by no means complete and is subject to change. Roblox is ranked as the 5th biggest gaming website in the world. It has over 144 million monthly unique visitors (MAU), making it number 1 in total and within North America, Australia and New Zealand. The games on ROBLOX are free to play, while microtransactions can be purchased using Robux, which are acquired by playing the games or through a transaction system called "Builders Club". Since 2016, Roblox has been making more and more money every year and is currently valued at over \$1 billion. Its headquarters are located in San Mateo, CA.

In May 2018, it was reported that the company had over 300 million daily active players worldwide. This includes the users who are in moderation, which is approximately 95% of all players. In addition, based on their own estimates, they stated that over 50% of these players play Roblox daily.
