The game was originally named 'Pixelmon' by the creator of Minecraft, Markus Persson (also known as Notch). It was inspired by crafting games like Little Big Planet and the popular multiplayer game World of Warcraft. Minecraft, like World of Warcraft, is a game that is played in a virtual world. It does not have a storyline or character progressions like most RPGs do. Instead, Minecraft offers players the possibility to build almost anything they want. You can create the same things that you see in Minecraft with your own imagination and creativity.",

Once you open the app, you will see a screen like the one below. Here is where you will choose whether to use "Infinite Resources" or "Instant Builds". The choices are self-explanatory and do not require any additional explanation. Now, tap on the "Start" button and wait for the progress bar to fill completely. When it does, click on the "Start" button again to begin with the process of downloading Minecraft version 1.8 and its features. Once you've purchased Minecraft, you can start building right away. You'll get access to infinite amounts of all the available blocks and items such as wood, wheat seeds and more. This will help you build whatever you want without having to worry about running out of resources. Even if that is not enough, the Instant Build feature will let you build an infinite number of structures in a snap. As soon as the download process completes, tap on the "Start" button once more and you can instantly begin building your world. The faster and more you play, the more you'll enjoy playing Minecraft. However, even if you don't want to play at all or just once in a while, the hack tool will help you build your structures without having to worry about running out of resources. If there is no issue with downloading it, then tap on the "Start" button and begin building!",

Minecraft Servers are generally run on either a physical server or a virtual private server (VPS). A physical server hosted by the user and rented from third-party companies, ISPs, universities etc. or free services like NFOservers.com, Adverline.pl and VirtualRack.co.uk which are VPS's seems to be the most common way to host your Minecraft Server. A VPS or physical server is better for most, since it is more stable and customizable and can be set up to run on the same machine as the player's computer allowing for an instant jump in to a server when desired.",
