Some of the most popular games on Roblox are roleplaying games, which allow players to create their own character and explore a world with other characters created by other players. These games are incredibly fun and addicting, especially if you want an alternate form of social media that is not just photo posting based.

The next games that would allow users to invite others into their worlds were Habbo Hotel where they had their FriendBook and later on also added a FriendChat system in December of 2011, Club Penguin where you could invite fellow penguins into your world, and Mario8 since 2014.

ROBLOX is the first game to allow players to create actual games that you can play online by using either a physical controller or just your keyboard. [124] The next game that would allow users to do this was Parkour Paradise on August 16th of 2012. [125]

One example of a troll game, created in 2005, was "Uppercut". This involved players being knocked into the air when they attempted to create their character. However, when the player hits the ground, they were shown a message saying that the creator of this game had disabled their inventory and that they had been defeated.
