ROBLOX is very similar to gambling. People who don't know better pay real money for fake game money that has no value. Children can be swindled out of all of their parents' hard earned money without realizing it's gone until mom/dad finds another credit card bill at the end of the month or worse.

On October 10, 2018, Roblox announced that they will be selling 49% of their ownership stake to Tencent Holdings for \$100 million. The transaction is subject to approval by the Roblox board of directors and Tencent before it goes into effect. The acquisition is part of a strategy by RoLabX to become a global gaming powerhouse with operations in China. The deal also confirmed that Tencent will continue to operate as the chief customer and user experience partner for ROBLOX.

Robux are the primary currency in Roblox. They can be used to purchase a variety of clothing, accessories (such as hats and T-shirts), tools, gear (backpacks, jet packs, and recovery kits), armor (vests and helmets), vehicles, special movement abilities (for example flying or invisibility), decals (decorative symbols which can be placed on vehicles or buildings) and more. The minimum one-time purchase of Robux is US\$4.95 (\$5 Note: this price has been around since 2013 but was not posted until 2015). Many items require substantially larger sums to afford them.

In May 2018, it was reported that the company had over 300 million daily active players worldwide. This includes the users who are in moderation, which is approximately 95% of all players. In addition, based on their own estimates, they stated that over 50% of these players play Roblox daily.

The inventory of each user cannot be accessed by anyone else. If you want to find out what a piece of furniture is for, you are going to have to purchase it from your inventory. There is no sharing of items between users; they can only be found in your own private stash.
