In February 2018, it was reported that a game called "Miner's Haven" has been criticized by Roblox users for having a suicide feature where players would have the option of killing themselves when their health reached zero. The players who played this game received a message from the developer named Master Zen said that he was working on an update that removed this feature. The update was released in March 2018 and it included an anti-suicide feature where the health would reset to 100 instead of 0. However, the developer confirmed that he would "still allow players to commit suicide if they are in the mood". To make up for this issue, Master Zen released a series of development updates that included fixing bugs and adding new features to "Miner's Haven".

On November 2nd, 2018, ROBLOX announced that the company is looking into implementing state-of-the-art anti-cheat technology. This was made to reduce the chances of "boters" putting random objects in games that don't belong there or making designs that look like they can be through a video editor. The company also stated that if there are any issues with their anti-cheat software, they will let everyone know as soon as possible.[24]
