The fourth group of "card packs" was released on November 4, 2016. The card packs are no longer available for purchase and will become exclusive to players who have paid for a premium pack, however the new cards will be shared between both versions of "Coins & Curses".

On September 6, 2018, Moon Active released Coin Master: Puss in Boots "(Kasegi 2: Bukimi no Tane)" for iOS as a free app (it is not available on Android). This "Coin Master" title features an updated version of the popular video game "Puss in Boots". The game was released in Japan initially as part of Moon Active's "Coin Masters" series. However, this version of the game was never released outside Japan. This version contains microtransactions which can be removed by paying \$4.99 for an ad-free version. The user review for Coin Master: Puss in Boots is composed of 4.0 out of 5 stars (out of 1 vote) from 2 users, with a user rating of 4.0 out of 5 stars (out of 2 votes)."

In January 2017 Moon Active announced that they had signed an agreement with Netflix to develop a free to play mobile version of Coin Master for Android and iOS devices. The game was later released in beta form as of February 2018. It is titled "Coin Master: Poke Map" and is similar to other games developed by Moon Active such as Poke Monsters World Tour. This version of the game allows players to view the world around them (using real location coordinates) and find loot based on their current location within the game. Collectible items such as equipment, potions and rare drops can also be found."

Great idea but... by Crhbxxra on 2015/06/20 20:56 I like this game but when you are done with your board there is no reason to go back to it and play again. This makes it really difficult to get more coins. The game should have a reward system that comes in every few days or something. I feel like I am just wasting time playing the same puzzles over and over without reward."

The "Coin Master: Puss in Boots "(Kasegi 2: Bukimi no Tane)" hack enables players to get unlimited coins and gems. By removing the gems from your inventory, you will still have the game unlocked as well as all the features that come with it! You can install the mod in two ways: permanent and temporary. You can use the permanent version to avoid any in-app purchases or data loss. The tool also contains a blacklist which you can use to block certain games from being hacked. This means that if you encounter a game that has been blacklisted by your device, then it will not be hacked by our tool. The temporary version is meant for people who do not want to use the permanent version, and it is a safer way to get your game hack. Download [Android - Permanent]",
