On January 23rd 2018, ROBLOX announced that they would be closing down their Minecraft marketplace. The marketplace would close on February 28th 2018. In February 2018, ROBLOX began to create more games for mobile devices.[78]

If you like playing Roblox, then you will really like these codes because they will enable you to play the game in a whole new way. You can use all of the robux that can be obtained directly from ROBLOX and this will make all of your dreams come true by allowing you to play all of the different games that are available here so that they can fill your time with lots of fun and entertainment.

ROBLOX has also come under criticism for not having any sort of Quality Assurance, meaning that there is a high chance that the art in users' games will have issues, such as visual glitches, poor texture quality, and various other issues with the art itself.

Hacking Roblox is a problem that will always exist. This is because there are many different forms of hacking that are constantly evolving. One of the most common methods of hacking Roblox accounts today is through phishing. This method involves an email being tailored to look like it came from a trusted sender to gain access to a person's account and information such as passwords, usernames, mother's maiden name, Robux balance, etc. Another way that hackers hack into Roblox accounts is through using proxy sites. This method involves people using websites that offer their own proxies in order to hide their inputs and output information from the public eyes. People can hack a password by using the obtained information from other websites and then use an automated script to guess the password. This method is not only used for Roblox, but also for other accounts that are associated with games.

Free Robux Codes Exploit Sites These are sites that use exploits in the game coding to allow players to get free Robux without needing to use a code. Many of these sites also have viruses/spyware/malware inside them, so be careful when visiting them. Most of these websites are created by people who do not know how to program and may be extremely buggy or cause your computer harm.
