The minecraft was founded in 2009. It is a sandbox building game that uses a textured voxel world to build anything players can imagine. You may create a forest, desert, swamp or any other terrain type with the use of multiple pre-made building blocks. The game also has many other types of biome like hills, mountains and water as well as structures such as villages and dungeons for the player to explore.",

You must be careful about what items go into your inventory because once it goes into your inventory, it cannot go back out unless you die and respawn at a new random spawn point. Another type of server is a Creative Server. This type of server focuses around the idea of you being able to build anything that your imagination can think of. You don't have to be creative in game; it's similar to Minecraft, but it allows you to be a lot more creative with the blocks and items in the game. There are many different types of servers where you can connect; if you feel like there isn't enough, another way you could connect is by using a private server. A private server is highly customizable and allows even more freedom than a public minecraft server because there are no other people connected to the world at the same time as you. You can make the server with your friends and do anything that you can do on a public minecraft server, but with more freedom",

But this is only one part of Minecraft, the real fun part comes when players start to build furniture, create rooms, ships or even whole towns. In the beginning of the game players will probably only know how to mine for stone and wood. If they want to build something they have to find these items in the world. But there are other materials out there as well like gold, diamond and even iron.",

Rust is primarily played on Slither.io, an online multiplayer server based in Germany with the majority of servers based in North America. Rust has been praised as being "pure fun" and "a breath of fresh air", while criticism included the poor graphics compared to other survival games such as "Minecraft". Due to its ability to be played on servers without custom content, it is also much less popular than Minecraft due to better compatibility of graphics with other graphical engines. On January 7th 2014, Steam announced that "Rust" had officially passed 10 million sales, and by August 2017, the game had sold over 3.5 million copies alone on Steam. As of April 20th 2018, "Rust" has sold over 5 million copies across all platforms including Steam",

Minecraft is an open-world sandbox game that has a lot of fans, and you can find that people have already made quite a few modifications for it. These modifications are known as mods, and they can be installed through a simple process that only takes a few minutes to complete. More Info Download: MINECRAFT MODS",
