On May 16th, 2018, ROBLOX announced that they were updating their "Terms of Service" section of the website to disallow using custom models or code to explicitly gain any sort of advantage in-game. They also block users from uploading custom model and code files.[20]

Roblox users sometimes experience glitches that can let them bypass the moderation system. For example, if a moderator sends you a message and you reply right after they ban you, it will say that your message could not be delivered because they are moderating (unless you previously muted or blocked the user).

On July 6th 2018 Roblox launched a new block building game called Create Lab. Many players claimed that it was not as good as other games such as Robloxia and Zombiewood. They criticized the fact is that you could not play with people who did not have the game.

Roblox is used for many educational purposes. For example, students can use it to practice basic coding skills such as the keyboard, the number keys, and how to move the characters on the screen. Teachers have also found it useful for teaching basic physics such as gravity and force. It's also used in STEM (Science, Technology, Engineering and Math) classes at elementary schools in which students have access to do robotics projects.

On November 11th 2016, ROBLOX added a feature called "ROBLOX Backpacks" to its website. Almost immediately after the release of this feature, a large amount of "spam" messages began to appear on social media platforms such as Twitter and Facebook. These occurred in the form of "spam links" that were posted by players who were seeking to make a profit. Roblox later modified its terms and conditions which resulted in all links being blocked from being posted until December 22nd, 2016.[76]
