## **CLICK HERE TO ACCESS TIKTOK GENERATOR**

Tiktok App's personality was designed based on the culture and practices of different countries around the world. It is a melting-pot for people, from all nationalities, racial groups, cultures and religions. The four basic features of Tiktok are: Chat (conversational chat), Chat Rooms, Voice Recording (voice message) & Sharing photos. The app uses barcodes and camera feature to paste contacts' information into the "conversation" stream for easy access. As such it gives users a visual representation that would make their communication much more real-time than other messaging apps like WhatsApp or Skype. Moreover, it also helps users to retrieve contacts they don't know by just scanning codes.",

In February 2019, it was also reported that some TikTok users who had provided their contact details for verification purposes had received a notification stating that their mobile number would be used by ByteDance for promotional purposes starting February 8, 2019. Meanwhile, others were receiving messages stating that their name would not be allowed to appear next to ByteDance's logo. Because of the fact that there appears to be no clear statement on how people are allowed to opt out of these types of promotional schemes, many have had a negative reaction to them. The following is an example screenshot of a comment by someone who was trying to upload a video with their contact details:",

On February 16, 2018, Musical ly filed another lawsuit in the U.S. District Court for the Southern District of New York against Snapchat as well as its parent company Snap Inc., alleging that these companies had falsely claimed in advertising materials that they had no similar patents-related claims against AppsFlyer Technologies (which provides analytics services for app developers). In this lawsuit, Musical ly claimed that Snapchat had infringed on four patents including US Patent Nos. 8,426,604 and 9,446,633 from a 2014 patent application by AppsFlyer Technologies for real-time engagement analytics for mobile applications; it also claimed that Snapchat had violated US Patent Nos. 6,192,977 and 8,526,721 which AppsFlyer had assigned to Snapchat in 2015. In addition to compensation for damages from these related claims, Musical ly sought injunctive relief requiring Snapchat and Snap Inc. to withdraw its advertising materials.",

To access the app's functions, users are required to have a smartphone and an internet connection in order to post videos. As with other social media platforms, the basic functions or features such as accessing information about a particular person or viewing people's latest posts are available to everyone while certain more advanced functions require a subscription or subscription membership to access.",

On July 10th 2018, Apple released a statement saying: "We have been working closely with TikTok to remove all inappropriate videos." and that it was working with the Chinese government to stop child pornography and harmful content from being posted on the platform."
