In December 2016, Roblox changed its website design again.[64] This can be viewed here: Roblox Main Page. An official subreddit was created in January 2012 by user pb_bacon.[65] It has since grown to have over 3,000 subscribers (as of May 2018) and 338 pages (as of May 2018).

The CEO and founder of Roblox is David Baszucki, who is also known as "Devdog". He made his first $1 million by using a stock option from a company that he had worked at called Original Media. He was fired from the company for not coming up with any new products despite having achieved success in the existing ones. After this, he started to work on ROBLOX alongside his friend Owen Hill. Although Roblox was founded only in 2009, they had already made their first $1 million by 2013.

ROBLOX has its own program called Easy School. Easy School is an educational system that can be used to learn and teach almost any subject, ranging from math to geography. There are also tutorials for programming languages like Unity3D using C# or Java. The tutorials can be watched in the ROBLOX Workshop Editlion or in-game, while teaching other tutorials are available on their website.

In early 2016, Roblox released an update that removed the "Customize" section from the User Interface. This introduced a new UI, which can be viewed here: Roblox Main Page. The new UI has many features that were previously built into the program such as a Store and a Help area.

In order to create a game on ROBLOX, one must first obtain a Builders Club membership (a free membership that is required). Upon purchasing this membership, players may then use the in-game tools provided by ROBLOX or the "Studio" to create games that are interactive like FPS, MMORPGs, and various other game types. The engine is not limited to 2D games like most flash games are; it can be utilized in the creation of 3D games too.
